

Lifting force tables EW100

Fig. 1: Lifting force table EW100 - Boom

Fig. 2: Lifting force table EW100 - Adjustable boom

max	Permissible load with extended dipper stick
A	Outreach from middle of rotating assembly
B	Load hook height
*	Lifting force limited by hydraulics

All table values are specified in kg (lbs.), in a horizontal position on a solid surface and without a bucket or an attachment.

- I Vehicle rearward facing with dozer blade support or stabilizer support, tipping through dozer blade or stabilizers
- II Vehicle rearward facing without dozer blade support or stabilizer support, tipping through rear axle
- III Vehicle in travel direction without dozer blade support or stabilizer support, tipping through front axle
- IV Vehicle 90° to the travel direction without dozer blade or stabilizer support

The lifting force of the vehicle is limited by the settings of the pressure relief valves and hydraulic performance or by the tipping safety mechanism.

Neither 75% of the static tipping load nor 87% of the hydraulic lifting force are exceeded.

Base of calculation: according to ISO 10567. Set pressure on the lifting arm cylinder 29000 kPa (4206 psi).

The lifting capacity applies for vehicles under the following conditions:

- Lubricants and operating materials at the prescribed levels.
- Full fuel tank.
- Cabin.
- Vehicle at operating temperature.
- Weight of the operator 75 kg (165 lbs.).
